

Interactive Video Quiz

Student Quick Guide

Getting started

The quiz is built into a YouTube video. At specific moments during playback, the video will pause automatically and question boxes will appear on screen. Answer them, submit, and press play to continue.

Step by step

- 1. Open the file** — Double-click the HTML file your instructor provided. It opens in Chrome or Firefox. The YouTube video loads inside.
- 2. Watch the video** — Press the play button. The video plays normally until it reaches a quiz point.
- 3. Video pauses** — When a quiz point is reached, the video pauses automatically. A notice appears at the top: "Video paused — answer the question(s), then press play to continue."
- 4. Type your answers** — Edit boxes appear over the video. Click any box and type your answer. Press Tab to move between boxes.
- 5. Press Submit** — Click the Submit button in the bottom-right corner (or press Enter). Each box turns green (correct) or red (wrong).
- 6. Try again or move on** — If you have tries left, correct your red answers and submit again. When ready, press the play button to continue the video.
- 7. View correct answers** — After all tries are used, Submit becomes Done and an Answer button appears below it. Press it to see all correct answers in green.
- 8. Final summary** — In the last 5 seconds of the video, a summary panel shows your score per question group and your total percentage.

Question types

Text / number input

A small edit box appears on the video frame. Type your answer (text or number) and press Submit. Some numerical answers accept a small margin of error — for example, if the correct answer is 6.708, typing 6.71 may still be accepted.

Column matching

Two columns of items appear with circles next to them. To connect a pair, click and drag from a circle on the left to a circle on the right. An arrow is drawn between them. To disconnect, drag from a connected circle into empty space — the arrow is erased. After submitting, correct connections turn green and wrong ones turn red dashed.

Scoring

Feature	How it works
Tries	Each question group has a limited number of tries (e.g. 3). The counter shows how many remain.
Best score	Once you get a question right on any try, it stays marked correct — even if you change it on a later try.
Group score	Shown as correct/total (e.g. 3/5) in the score label next to Submit.
Final summary	Appears in the last 5 seconds. Each group shows a percentage and tries used. Total = average of all group percentages.

Visual cues

What you see	Meaning
Black border	Unanswered — type your answer here
Green border + tint	Correct answer
Red border + tint	Wrong answer — try again if tries remain
Amber “Answer” button	Appears after all tries — press to reveal correct answers
Grayed-out Done	No tries left — inputs are locked

Tips

- Use **Tab** to jump between edit boxes quickly.
- Press **Enter** as a shortcut for Submit.
- You can **seek back** in the video to replay a section — the quiz will re-trigger when you reach the same timestamp.
- When you press **play**, all quiz elements disappear so you can watch the video without obstruction.
- If the video does not load, make sure you are **connected to the internet** and try opening the file in Chrome.

If you encounter technical issues, contact your instructor.
